SUMMARY

As a dedicated Software Analyst at Claysys Technologies, I specialize in both frontend and backend development utilizing AppForms for frontend tasks and SQL for backend operations. In our company culture, software developers are recognized as Software Analysts. Currently seeking new opportunities to leverage and showcase my diverse skill set acquired through hands-on experience and continuous learning in software development.

EXPERIENCE

Claysys technologies

Software analyst september-2023

I fulfill the role of a Software Analyst, where I am responsible for frontend development using AppForms and backend operations with SQL. Throughout each stage of development, rigorous manual testing is conducted to ensure the delivery of bug-free software solutions
